CONVENTIONAL POSITIONERS

Light - Medium - Heavy

ON TRACK TO TURN OUT
A PERFECTLY ENGINEERED PRODUCT

THE BEST SOLUTIONS FOR BETTER FABRICATION

With decades of engineering expertise and design skills, today's Bode positioners are second-to-none, handling workpieces from just a couple of hundred kilograms to several hundred tonnes. Size has never been a problem with Bode!

Free-standing, robust all steel fabrication, variable speed table rotation, round or square „T slotted“ tables with extension arms on some models, table tilt, steel gears, enclosed electric motors including electro-magnetic brakes, efficient built-in earthing, pendant remote push button controls on many models, and a range of optional

extras, all make Bode Positioners exceptionally valuable pieces of equipment on any production floor. Equally, they represent great value for money.

Contact us today for more information, or to discuss your special positioner needs.

**Model 1/VP.20
(Capacity 20,000 kgs)**

**Model 2/VP.10 Special (Capacity 10,000 kgs)
Special Positioner with manual elevating cradle**

**Model 1/VP.2
(Capacity 2,000 kgs)**

SPECIFICATION CHART

Rotation torque (R) is a calculation of Load (W) x Eccentricity (B)
Rotation Torque (R) = W x B = kg metres.
 To calculate the tilt torque (T) it is important to use the full distance to the table pivot point by adding the Centre of Gravity (A) and table pivot distance (G).
Tilt Torque (T) = W x (A + G) = kg metres
 Example: What weight can a 1/VP2 Positioner safely support with a centre of gravity of the load 200mm from the table face?
 Answer: $\frac{\text{Tilt Torque (T)}}{200\text{mm} + \text{Distance (G)}} = \frac{600}{200 + 150} = 1.714 \text{ tonnes}$
